

Ten tips to help you stay safe online.

1. Don't post personal information like your address, Email address, or phone number.

2. Think before you post. Once a photo, video or status of you or a friend is online, other people can see it and copy it, so it's no longer just yours.

3. Keep your privacy settings updated. Don't let strangers see your profiles, photos or videos.

4. Never share passwords with friends or strangers.

5. Only add people to your networks that you already know in person.

6. Don't meet people in person that you have met online. Tell your parents or carer about anyone suggesting to meet.

7. Not everyone is honest, so they may not be who they say they are.

8. Respect other people online.

9. Only use the internet when you are around trusted adults.

10. If you see something online that makes you uncomfortable, unsafe, or worried, leave the page open, put your device to sleep and tell a trusted adult right away. They can then check and report the site if necessary.
