'Learning for life, building a firm foundation'

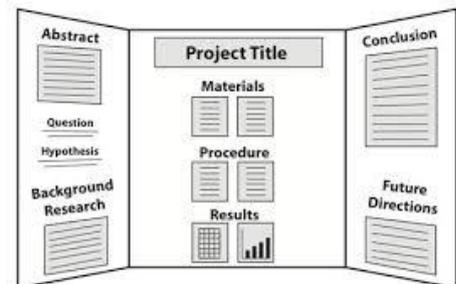

Dear families,

We are excited to announce the launch of our **STEM Week 2026 (STEM = Science Technology Engineering & Maths)**. This enhanced curriculum week in school and the optional STEM home learning project provides opportunities for all our super scientists to *flourish* as they choose an area of science that they would like to investigate and present their findings from. We look forward to this event and hope your children choose to participate.

- Your child/children will be introduced to **STEM** in school throughout 9<sup>th</sup> – 13<sup>th</sup> March (British Science Week).
- It is **NOT COMPULSORY** for children to produce a project and there is no suggested theme. From space, robotics and the environment, to animals, forces and chemical reactions – this is a great opportunity for independent thinking and to explore and experiment! Children could research existing inventions, achievements of significant scientists or design their own exciting experiment.
- Projects can be completed individually, in pairs or as a family group.
- To present their project, the children will need to create a **cardboard stand**.

## Suggested project structure:

1. **What I already knew/what I identified as the problem** (background)
2. **What I wanted to find out/solve/ my big science question** (aims)
3. **How I investigated /researched** (method)
4. **What I learned** (results and conclusions)

- Everybody who presents their own project will receive a **celebratory certificate of excellence**.
- Children's projects are due into school the morning on **Monday 9<sup>th</sup> March**. They will be presented to their teachers and classes in school during STEM week, before being celebrated at the STEM showcase event on **Monday 16<sup>th</sup> March**, which all parents/carers are invited to attend **3.15-4.45pm**.
- Each class will select 1 child who has demonstrated excellent engagement in STEM Week who will receive a medal.

We hope that this exciting opportunity will inspire families to continue to enjoy investigating, experimenting and have lots of science fun together.

Headteacher Lisa Harrison

To help inspire you there are many websites full of ideas such as:

<https://www.science-sparks.com/>

<https://www.britishscienceweek.org/>

<https://www.sciencebuddies.org/science-fair-projects/science-projects>

If you have any questions or would like any more ideas, please get in contact.

Many thanks for your continued support.

Mrs Cheema  
Science Lead.
